

SCAFFOLDING ERECTIONS (INTERMEDIATE)

INTRODUCTION

For various reasons, the construction industry all over the world is beset with more accidents and more serious injuries than almost any other industrial activity. Falls from scaffolds and scaffold collapses contribute to a considerable extent to the accident and fatality statistics.

In addition to the cost of human injury and death, accidents are unduly expensive in terms of damage to property and delays in completion of the projects. These effects often drive companies concerned out of business.

This Intermediate Scaffolding Erection course is provide participant as much as possible knowledge and necessary skills to enable them to understand and related safety standard and statutory requirements pertaining to any Scaffolding Erection.
