

SAFETY HANDLING OF FORKLIFT

SABAH SKILLS & TECHNOLOGY CENTRE

INTRODUCTION

Used of Forklift in various Industries now a days is higher compared to 20 years ago. But today Malaysia has become one of the world major importers and exporters of goods and products. Hence on many incident had happen involving forklift handling were recorded in the statistic, which shown 317 accident reported for forklift in year 2009 alone. It means almost every day one accident by forklift operator. This is because operators are not properly trained and expose to the hazard in handling forklift.
